

Informatix has developed an end-to-end document imaging application that is a solution for an agency's backlog of stored documents requiring imaging, indexing, storage, and retrieval as well as a state of the art method of managing their new document generation by automatically imaging, indexing, and storing, with immediate access ability in real time.

The application is known as COSTARS® and includes interfaces with several major delivery companies for the transport of paper files/documents from the customer's sites to the Informatix Document Management Center (DMC) and back to the customer, if they do not want the materials shredded. If the customer chooses to have their materials shredded, Informatix issues a Certification of Destruction to them.

COSTARS® is an application that is extremely user-friendly and intuitive. Training is completed within hours and agencies are able to begin using the application immediately. Shipping labels are created in COSTARS® through the interfaces with UPS and/or Airborne, thereby making shipments easily routed and tracked. This also allows DMC staff to locate documents quickly should a customer have an immediate need for one they sent for imaging.

If a customer chooses to have Informatix develop an interface between their business application and COSTARS®, the agency can have newly created documents automatically imaged, indexed, and stored. They can then access and print the document through COSTARS® within minutes. And if a customer generates new documents that do not lend themselves to automatic imaging because they may require signatures or certification stamps, the customer can then treat those documents the same as their stored records by making an entry into COSTARS®, and including them in their next shipment to the Informatix DMC. Each document requires a slip-sheet and each box they fill requires a shipping label - both are done within minutes. COSTARS® can also be customized to write data entries back into the business application so users can know if a document is imaged and stored without toggling to another application.

Informatix is proud to be part of the Department of General Services solicitation for qualified vendors for Document Conversion Services and is looking forward to receiving orders so that Informatix can offer this all encompassing, one-stop shopping solution to government agencies who often times have to build their own end-to-end solution using several vendors.

Price Code	Service	Description	Unit	Price List
	Paper to Electronic Imaging			
	<u>Document Preparation</u>			
INFX-001	Document Preparation & Restoration	Sorting documents, removing staples, making copies of damage paper, unfolding corners, other scan prep procedures	Per Hour	40.00
	<u>Paper Scanning</u>			
INFX-003	Scanning 8.5" x 11"	Scanning up to 300dpi tiff files	Per Image	0.117
INFX-004	Scanning 8.5" x 14"	Scanning up to 300dpi tiff files	Per Image	0.127
INFX-005	Scanning 11" x 14"	Scanning up to 300dpi tiff files	Per Image	0.152
INFX-006	Scanning 11" x 14" Burst	Scanning up to 300dpi tiff files	Per Image	0.186
INFX-007	Scanning 11" x 17" B Size	Scanning up to 300dpi tiff files	Per Image	0.235
INFX-008	Scanning 11" x 17" B Size Unburst	Scanning up to 300dpi tiff files	Per Image	0.416
INFX-009	Additional Resolution (each 100dpi)	Additional charge to increase scanned image resolution i.e. 400dpi, 500dpi, 600dpi	Per Image	0.039
	<u>Indexing</u>			
INFX-010	Key Data Entry	Manually entering indexing information for document searches	Per Key Stroke	0.042
INFX-011	Indexing - CAR System	CAR System Indexing	Per Key Stroke	0.052
	<u>Quality Control</u>			
INFX-012	Random inspection of images	Quality control inspection of random images scanned	Per Image	0.030
INFX-013	Inspect each image	Quality control inspection of all images scanned	Per Image	0.036
	<u>Miscellaneous</u>			
INFX-002	Shredding	Destruction of original paper documents	Per Cubic ft	7.800
	Digital to Digital Electronic Imaging			
	<u>Document Conversion Programming</u>			
INCS-300	Automated Capture Planning	Analysis and design of data and forms capture automation processes	Per Hour	\$200.00
INCS-310	Custom Software Development	Development of custom software for electronic interfaces to external systems	Per Hour	\$200.00
INCS-320	Project Management	Management of project to create custom software	Per Hour	\$200.00
	<u>Image Creation and Storage</u>			
INCS-330	Conversion and Storage of 8.5" x 11"	Image at 300 dpi resolution stored electronically	Per Image	0.117
INCS-340	Conversion and Storage of 8.5" x 14"	Image at 300 dpi resolution stored electronically	Per Image	0.127

INCS-350	Conversion and Storage of 11" x 14"	Image at 300 dpi resolution stored electronically	Per Image	0.152
	<u>Image Indexing</u>			
INCS-360	Automatic Bar code indexing	Read and store index values stored on bar coded slip-sheet or documents	Per Image	0.042
INCS-370	Manual indexing	Manually entering indexing information for searches	Per Image	0.250
	<u>Quality Control</u>			
INCS-380	Random inspection of images	Quality control inspection of random images scanned	Per Image	0.030
INCS-390	Manually inspect each image	Quality control inspection of all images scanned	Per Image	0.036
	<u>Web Based View and Print</u>			
INCS-400	Application Design and Planning	Analysis and design of custom software application for retrieving images	Per Hour	\$200.00
INCS-410	Custom Software Development	Development of custom software application for retrieving images electronically	Per Hour	\$200.00
INCS-420	Project Management	Management of project to create custom software	Per Hour	\$200.00
	<u>Media release</u>			
INCS-430	4mm DAT tape	Converted images in electronic format on tape media	Each	\$50.00
INCS-440	8mm DAT tape	Converted images in electronic format on tape media	Each	\$60.00
INCS-450	200 Gb LTO tape	Converted images in electronic format on tape media	Each	\$120.00
